

R. M. of OAKVIEW

PUBLIC NOTICE IN REGARDS TO THE RAPID CITY AND AREA COMMUNITY COMPLEX

The Council of the R. M. of Oakview, in consultation with the Rapid City Rink Board, applied for a grant to Community Places to complete upgrades to the Rapid City rink. While obtaining quotes for grant purposes, it was brought to our attention that a structural engineer should be contracted to inspect the facility. The following recommendations were received from RAF Engineering:

- 1) that this structure is unsafe for public occupancy without remedial action undertaken;
- 2) that an exterminator be hired to thoroughly inspect all the structural wood members with respect to an insect creating holes and sawdust piles and implement a plan to destroy the infestation;
- 3) that based on the exterminator's report, a more in-depth structural assessment be performed, which will detail structural members requiring repair or replacement due to the infestation as well as possible remedies for the structural deficiencies noted.

Please accept this as notice that the Rapid City and Area Community Complex is closed for public occupancy at this time. An exterminator has been contacted to inspect the facility and make recommendations in regards to insect infestation and more information is being obtained in regards to an in-depth structural assessment being completed. Sorry for the inconvenience this will cause to facility users. Any updates will be posted on our website at rmfoakview.ca.

Dated this 5th day of September, 2018
